CO-CHAIRS' MESSAGE

In 2021, amidst the turbulence of a troubled world, RESULTS UK celebrated its 35th anniversary. It was a year which required us to find new ways to create change on the issues we care about, and it was ever-more important to us that our methods also embodied our values.

Several of our funders have recognised this and have increased their investments so that we can confront the challenges we see in global health, education and nutrition. Our work on COVID vaccine equity is challenging rich countries' prejudiced approach to vaccine donations and manufacturing, and we are advocating for renewed investments of £60 million per year for the Coalition for Epidemic Preparedness Innovations (CEPI). A grant on foundational literacy and numeracy means we've been able to scale up our work on education, alongside our hosted organisations.

However, we were on the defensive for some of our campaigning efforts. We fought unsuccessfully against the capping of the UK Official Development Assistance (ODA) budget at 0.5% of Gross National Income, although we were pleased to see that Gavi, the Vaccine Alliance will receive its full commitment of £1.65 billion. In other areas, such as the UK pledge to the Global Partnership for Education, and for nutrition, we got less than was asked for. We're nevertheless proud of campaigners around the country for writing letters, meeting with MPs and being articulate, passionate advocates for a world without poverty.

We are changing how we advocate and seek to have influence. For example, we ran our first virtual parliamentary delegation in partnership with KANCO in Kenya. We are also deepening our commitment to our anti-oppression values in the campaigning we do, by running a training day for grassroots campaigners on inclusive and creative campaigning, and making our voice heard within the sector on the ethics of development advocacy.

We are proud that after seven years of hosting the TB Europe Coalition (TBEC), they are now established independently in the Netherlands and Ukraine. Our relationship and commitment to our advocacy partnership remains.

In 2022, we will start a promising new chapter with a new Executive Director, as Aaron Oxley has informed us of his intention to hand over his role after 13 years. We are grateful for the depth of relationships which he has developed and the impact which RESULTS UK has had under his charismatic leadership, but are nevertheless excited for our future as we strive to enhance our efficacy yet further in this politically volatile era.

THANK YOU TO EVERYONE WHO CONTRIBUTES TO OUR WORK. IT IS THROUGH YOUR COMPASSION, CHALLENGE AND COMMITMENT THAT WE CAN INFLUENCE DECISIONS THAT WILL MAKE A DIFFERENCE TO PEOPLE AROUND THE WORLD.

EXECUTIVE DIRECTOR'S REPORT

When taking on the role of Executive Director of RESULTS, I had absolutely no idea that this would be the start of a journey that has lasted over a decade. These last twelve years have been an honour, a privilege, and a blessing unlike any other, and it is with pride in everything that RESULTS has accomplished that I announce that 2022 will be my last year as Executive Director.

I want to thank successive boards for having faith in me and in supporting me and the organisation with good governance and oversight, always helping me hold the vision of a world free from poverty, and the people who will help bring that into being, at the very core of our work.

I want to thank my colleagues, in RESULTS UK and in other organisations around the world, for their smart, passionate advocacy, for the quick thinking, for the thoughtful dedication, for the long hours, and for the global solidarity. One of the greatest benefits of working for a purpose-driven organisation is that your colleagues share that higher vision: there is an incredible power to that. My only regret is that I have worked with so many excellent people that it is impossible to thank everyone by name.

I also want to thank RESULTS' grassroots volunteers. When I began this role back in 2009, one of my first tasks was to take a tour of the UK, to visit the people that make up the RESULTS network. Many of you opened your homes to me and we talked about your own commitment to the goal of ending poverty and inequality, and of saving lives. I came away from that trip renewed in my faith of how different real people are from the apathetic and selfish images too often seen in popular culture and the media. People want good things for each other, and no-one wants others to suffer unnecessarily when solutions are so close to hand.

This to me is at the very heart of what it means to be working for RESULTS: to always be reminded, and to remind others, that none of the problems we see are unsolvable, none of the challenges insurmountable. What it takes is the realisation that it can be done, and that it will be done if enough people demand it.

The last few years have seen some of the biggest changes in our sector in living memory: DFID being subsumed into the FCDO, huge cuts to the UK's ODA, and the closure of critical lifesaving programmes. Alongside this, we've seen the awakening in our sector that we need to do better on safeguarding, ending oppression, and in particular recognising and opposing racism. This work is a lifelong journey, but RESULTS has taken some truly meaningful steps and I know those will continue.

RESULTS exists to end global poverty and to help unlock people's own power to do so: this is a project that is long-term and requires patience, persistence, and passion. I am so pleased to have been able to play a small part in that for so long, and look forward to seeing RESULTS continue its amazing work.

ONE OF THE GREATEST BENEFITS OF WORKING FOR A PURPOSE-DRIVEN ORGANISATION IS THAT YOUR COLLEAGUES SHARE THAT HIGHER VISION: THERE IS AN INCREDIBLE POWER TO THAT.

**AARON OXLEY,
EXECUTIVE DIRECTOR**

STRATEGIC REPORT

WHO WE ARE: VISION, MISSION AND VALUES

RESULTS is a movement of passionate, committed, everyday people. Together we use our voices to influence political decisions that will bring an end to poverty

Our **VISION** is a world free from poverty by 2030 and our **MISSION** is to work with others to create the public and political will to end poverty, by enabling people to exercise their personal and political power for change.

Our **VALUES** underpin both why and how we go about achieving our mission and goals. As such, none of the values below should be read as ones that are solely outward-facing, but apply universally across what we do and how we work.

ACCOUNTABILITY

Citizens everywhere have the right to hold their governments to account.

EMPOWERMENT

We believe every person has the power to contribute to changing the world and we work with them to do so.

EVIDENCE

We will use robust evidence to inform our advocacy and will not advocate for proposed policies and practices that are not supported by evidence.

EQUITY AND INCLUSIVENESS

RESULTS strongly believes that valuing diversity and putting equity and inclusiveness as one of our core values benefits us all, enhancing our legitimacy and effectiveness.

PARTNERSHIPS

Working collaboratively with others towards mutually shared goals is essential for creating meaningful shifts in political will. Combined with our other values, we recognise that the primary experience of poverty and its solutions are best understood by the people who have lived experience, and their voices must be heard.

MODEL OF CHANGE

We believe the key building blocks in escaping poverty can be most simply articulated as “health, education, economic opportunities and citizen voice”. These are the things that all people, wherever they live, need and have a right to. If people can live lives free from disease, this frees our human potential. When we are educated, it unlocks so many life opportunities for us, including an understanding of our human rights and an ability to fight for them. People who have an education have an increased ability to participate in decisions that affect them, whether those are in the family, the community or the nation. If we are healthy and well-educated we still need to be able to access economic opportunities to make the most of our lives. Finally, and perhaps most importantly, people lifting up their voices to ensure their voices are heard is an essential part of building a world free from poverty - and everyone should be able to participate.

COMMITMENT TO ANTI-OPPRESSION

The rise of the Black Lives Matter movement following the murder of George Floyd and other Black people in 2020, led RESULTS, along with many other organisations in the international development sector, to question our approach to delivering our mission, and our sensitivity to the impacts of systemic and historic racism and other forms of oppression on staff, partners and people we advocate with. In 2021, this analysis and work has deepened and intensified, within our framework of being committed to Listen, to Learn, and to Act and do more and do better in tackling oppression in all its forms. We have made a specific public commitment to looking at these issues and to map out how we, with our mission, vision, values, and organisational strengths, can best contribute to dismantling the structural racism that so negatively affects people, communities and countries, preventing the ending of poverty. This work is ongoing, and much more needs to be done.

Work we are proud to have done or initiated this year includes:

- **signing up to the 7 ACEVO principles to address the diversity deficit in the voluntary sector;**
- **running our first training on inclusive campaigning for our grassroots advocates;**
- **taking part in sector-wide and internal discussions on how to frame debates about people and communities with lived experience of poverty and oppression, including at our National Conference;**
- **working to diversify our Board and staff body, and addressing the skills and knowledge needed for them to deliver meaningful change;**
- **submitting evidence to the International Development Committee’s inquiry on the Philosophy of Aid and its sub-enquiry on the Impact of Racism in the Aid Sector,**
- **encouraging self-reflection amongst international development actors;**
- **working in collaboration with advocacy partners in the so-called Global South to develop communications and advocacy activities; and**
- **amplifying the voices of people with lived experience of poverty and inequality, such as our ‘Youth Leaders for Health’ programme and via the ACTION partnership.**

THIS IS JUST THE START OF A JOURNEY. WE SEEK TO CONTINUE THIS WORK AS WE DEVELOP OUR NEXT STRATEGIC PLAN DURING THE COURSE OF 2022.

OUR APPROACH

Parliamentary Advocacy

Recognising the central role that governments play in allocating resources and setting policy to fight poverty, our parliamentary advocacy helps create champions for our development issues, ready to influence other decision-makers in our own Parliament or their international peers. We aim to build powerful and lasting relationships with a wide range of parliamentarians from across political parties and Houses, whilst retaining our credibility and political neutrality.

Grassroots Advocacy

RESULTS' grassroots advocates are ordinary people, but extraordinary campaigners speak and act powerfully within their communities. They spend months, and often years, building relationships with their elected representatives and other decision makers. They read, learn and actively participate in training to become experts on our issues to the point at which they can comfortably hold their own in a debate.

RESULTS

Policy Advocacy

Through our policy work we develop rigorous expertise to engage in top-level discussions with civil servants in the UK and with international organisations, or to move other civil society organisations to take up our policy positions.

Operations

Through our Operations team, we ensure that we have the organisational capacity in place to be sustainable, such as our finance and resource mobilisation functions, as well as ensuring that RESULTS is a great place to work and volunteer.

MEASURING CHANGE

During 2021 we have been strengthening our Monitoring, Evaluation and Learning approach to measure the impact of our work. Whilst measuring the allocation of resources by governments and multilateral funds to each of our issue areas remains key to determining the ultimate impact of our activities, we also now collect a range of other quantitative and qualitative data to monitor and evaluate the progress of our work for each of our issue areas and the impact of the organisation.

OUR GOALS

THESE GOALS ARE FOR THE STRATEGIC PERIOD 2020–22, BUILDING ON OUR WORK IN THE PREVIOUS STRATEGIC PERIOD 2017– 2019.

01

CITIZEN VOICE

Strengthening people's power to effect change, globally and in the UK.

02

HEALTH

TUBERCULOSIS:

Ensuring that persons with TB have access to affordable treatment, care and support.

CHILD HEALTH:

Promoting equitable access to immunisation.

NUTRITION:

Ensuring the right nutrition at the right time.

UNIVERSAL HEALTH COVERAGE:

Attaining health for all.

03

EDUCATION FOR ALL

Working to ensure inclusive, accessible and equitable education.

04

ECONOMIC OPPORTUNITY

Realising the potential for people to earn a living, including in the face of climate challenges.

05

DEVELOPMENT FINANCE & TRANSITION

Ensuring a focus on people living in poverty as development spending changes.

Carrie in Birmingham meets her MP Preet Gill

01 CITIZEN VOICE

Throughout 2021, over 350 actions were taken by the RESULTS grassroots network across the UK on a range of issues, primarily focused on the Official Development Assistance (ODA) budget, global education, global nutrition and an equitable response to the COVID-19 pandemic. While the pandemic continues to pose challenges, RESULTS campaigners have continued to engage with their MPs and Ministers by writing letters, holding virtual meetings and through social media. Some highlights from the network include:

- ▶ **Letters to the Foreign Secretary, blogs and media articles on the global malnutrition crisis. We engaged the network on a niche action calling on the UK to adopt a nutrition policy marker and better measure the impact of nutrition work, which was announced at the Nutrition for Growth Summit.**
- ▶ **Contacting over 40 MPs to voice public support for the commitment of spending 0.7% of Gross National Income on Official Development Assistance (ODA) in the campaign to fight the cuts to the ODA budget. In collaboration with other organisations across the UK, our network sent a clear message to the Government that there is public opposition to this cut.**
- ▶ **Holding a training day on inclusive and creative campaigning in May with an anti-racism consultant, and our National Conference with high-profile speakers Dr. Jeffrey Sachs and Gina Miller, and four advocacy meetings with MPs and civil servants.**

2021 also saw the conclusion of the Youth Leaders for Health (YL4H) programme, which RESULTS UK ran in partnership with four organisations across Africa, training 25 young people from Ghana, Tanzania and Sierra Leone to advocate for policy change on malaria prevention and health system strengthening. This was regarded by the evaluators of the programme as “a transformative leadership journey”. Highlights of the programme’s final months include a video for *World Happiness Day* and a conference call between YL4H advocates and RESULTS campaigners in the UK in March.

Elvis Saitoti Clinical officer at Shompole delivers medication to TB patients' homes to minimise contact at the health centre. This disruption during the COVID-19 pandemic meant that he was not doing normal work at the hospital.

02 HEALTH: Tuberculosis (TB)

2021 was a challenging year for the global fight against TB. The pandemic has set back progress by an estimated 12 years, with the number of people dying from TB rising for the first time in a decade, to 1.5 million in 2020. 2021 also saw catastrophic cuts to the UK's global health research and development budget, impacting key projects for advancing life-saving TB tools. In response to these challenges, RESULTS UK has led advocacy in several key areas, including:

- ▶ Amplifying the voices of TB-affected community members through the new TB Vaccine Advocacy Roadmap working group, including publishing a letter written by TB survivors to G20 leaders highlighting the need for investment in TB vaccines.
- ▶ Advocating on behalf of the Product Development Partnerships to ensure that their budget line was retained within the new FCDO budget. Work is continuing to advocate for additional funding after catastrophic 85% cuts.
- ▶ Playing a major role in advocacy around the Global Fund to Fight AIDS, TB and Malaria's upcoming 7th Replenishment.
- ▶ Pushing for change at the Global Fund, publishing key recommendations for their new strategy with ACTION partners, and advocating for a change in the allocation of funding to increase the proportion of funding for TB programming.
- ▶ Supporting parliamentary engagement through the All Party Parliamentary Group on Global TB. The APPG hosted a virtual TB delegation to Kenya alongside MPs on the Kenyan Health Select Committee and has facilitated engagement with key Global Fund stakeholders in Parliament.
- ▶ Supporting the "UK Academics & Professionals to End TB" (UKAPT) network to maximise their advocacy potential with parliamentarians, generating advocacy materials for the group to more easily engage local decision-makers and supporting the new Executive Committee to refresh the group's terms of reference and strategy for the coming 2-year term.

Ethiopia during earlier days of COVID-19 pandemic. An older female guardian holds two children, one with their mouth open and tongue sticking out whilst a female healthcare worker drops polio vaccine drops into the child's mouth from a safe distance.

02 HEALTH: Child Health

Front cover of the improving vaccine uptake report

The impact of COVID-19 pandemic on child health was realised in 2021 with the number of children missing out on essential immunisation being the highest in over a decade. 2021 was a year of advocating for catch-up activities, sustaining robust health systems, and ensuring that despite a challenging ODA landscape in the UK, work continued to help maintain and increase political will to invest in routine immunisation and, in particular, polio eradication efforts. Highlights from 2021 include:

- ▶ In May 2021, the APPG on Vaccinations for All launched a report entitled '*Improving Vaccine Uptake*'. The launch particularly attracted high levels of parliamentary engagement and representatives from Gavi, the Vaccine Alliance, civil society, academia and pharmaceutical companies.
- ▶ During an incredibly difficult year with cuts to the UK's ODA budget, the Global Polio Eradication Initiative (GPEI) endured a 95% cut to the expected contribution in 2021 from the UK. Despite these challenges, work continued to help maintain and increase political will to invest in polio eradication efforts. We ensured GPEI's expertise in global health security and wider health systems strengthening were consistently referenced in briefings to MPs; tabled parliamentary questions regarding the UK's existing pledge to GPEI; and coordinated our advocacy efforts with allies ahead of any briefings to the FCDO and GPEI. In 2022 it will be critical to maintain polio on the political agenda to ensure the UK Government fulfils its existing pledge to GPEI.
- ▶ Following a successful replenishment summit for Gavi in 2020 that exceeded expectations, 2021 focused on ensuring that UK's pledge to Gavi was secure amidst a challenging ODA landscape; and on influencing Gavi's policies to ensure they prioritise equity, impact, and healthy vaccine markets. We played a leading role in the activities of UK coalitions that prioritise equitable access to immunisation. For example, chairing various immunisation communication and advocacy partners calls, co-organising an *event* during World Immunisation Week on improving vaccine uptake, and taking on a leadership role to provide strategic feedback to multiple representatives on Boards of multilateral organisations such as Gavi. We received verbal reassurance from the FCDO that the UK's pledge to Gavi will be honoured with the first payment for the new strategic period successfully being disbursed in *August 2021*.

Grassroots campaigners in Poole run a stall at a local event to encourage others to take action on malnutrition and send a letter to the Foreign Secretary.

02 HEALTH: Nutrition

2021 was the Nutrition Year of Action, with key global events to galvanise actions against malnutrition, including the UN Food System Summit and the Nutrition for Growth (N4G) Summit. Despite the reduction of the UK's ODA budget, we ensured that tackling malnutrition remained a priority on the agenda at a UK and global level.

- ▶ We raised awareness of nutrition by publishing two reports: *Malnutrition is Sexist* and *Nutrition as a Human Right*.
- ▶ As part of the International Coalition for Advocacy on Nutrition (ICAN), we convened a UN Food System Summit Dialogue where global civil society organisations, advocates from countries with high rates of undernutrition, and Youth Leaders for Nutrition (YL4N) discussed the changes needed to ensure better nutrition for women and girls.
- ▶ We pushed for a UK Government N4G commitment of £120 million per year on nutrition specific programmes, and £680 million per year on nutrition sensitive programmes between 2021 and 2025. Although the announcement was not made at the summit, with the ICAN UK coalition we kept the pressure on and funding was announced at the beginning of 2022, though not at the scale hoped.
- ▶ With our grassroots activists, we successfully campaigned for the adoption and implementation of the OECD nutrition policy marker across the FCDO.
- ▶ As the secretariat of the All-Party Parliamentary Group on N4G, we have mobilised Members of Parliament and elevated the N4G agenda through parliamentary questions and debates.

Securing policy and financial commitments as part of the N4G Summit 2021 was a major advocacy success. We will continue our efforts to ensure increased financing for nutrition programmes and tangible progress towards the WHO Global Nutrition Targets set for 2025.

A September protest in South Africa calling for a people's vaccine. © The People's Vaccine Alliance, 2021

02 HEALTH: Universal Healthcare, Including COVID-19

COVID-19 has irrevocably changed the world as we know it over the last 2 years. It has caused the death of more than 5.7 million people directly, and many millions more indirectly through its disruption to livelihoods, food systems, education and routine health care. The pandemic has diverted resources and political will from our other issue areas and we are also operating in a constricted fiscal space due to the UK's ODA cuts. Many issues and organisations are now competing for this more limited pot of funds. In 2021, vaccine rollout campaigns gathered pace in some countries, whilst others continued to be denied access to crucial doses and necessary ancillaries for delivery. Our advocacy on access has included:

- ▶ Three grassroots actions (dose donations, the pace and pricing of these donations, and the impact of intellectual property rights on vaccine manufacture).
- ▶ Active leadership in civil society coalitions on dose-donations and the barriers intellectual property rights pose to upscaled vaccine and health tools manufacture, with particular reference to the Trade Related Aspects of Intellectual Property Rights (TRIPS) waiver tabled by the Governments of South Africa and India.
- ▶ Letters to Government Ministers on COVID-19 financing and resource mobilisation; we've received responses from the Treasury, the Department of Health and Social Care, and connected with senior civil servants across the FCDO to discuss this further.
- ▶ We have centred this advocacy in our commitment to anti-oppression and published a blog, *Prejudices and Privileges: how can we explain the terrible vaccine inequity of the COVID-19 response?* which was viewed 213 times with an average read time of 10 minutes after three days of being published.
- ▶ We secured a backbench business debate on inequitable access to vaccines and worked with stakeholders across two coalitions and one APPG to produce four robust briefings on: dose-donations; the TRIPs waiver; health systems strengthening and financing; and routine immunisation.

Social media post used during one of our monthly campaigns

03 EDUCATION

Against this backdrop, the severe cuts to the UK ODA budget included cuts of at least 25% to education. 2021 also saw the UK co-host the Global Education Summit, which was designed to fully-fund the Global Partnership for Education (GPE) for the next 5 years. The outcome was sadly underwhelming, with the UK pledge to GPE falling £170 million short of the £600 million needed, while the overall funding target was missed by over US \$1 billion. Despite this challenging context, we achieved the following in 2021:

- ▶ Our GPE replenishment activities included: a parliamentary round-table event in January 2021 with the CEO of GPE, a director general of the FCDO and 16 parliamentarians; a UK-Kenya parliamentary exchange; co-ordinating a letter to the Prime Minister from over 50 parliamentarians calling for a £600 million UK pledge to GPE; leading on parliamentary engagement for the Send My Friend to School Coalition; a grassroots monthly action and accompanying letters to the Foreign Secretary; regular engagement with the FCDO; supporting CEO-level ministerial meetings; blog posts and press releases; and RESULTS staff attending the replenishment summit.
- ▶ Supporting an International Day of Education debate in the Commons Chamber, led by Harriett Baldwin MP, alongside colleagues at the International Parliamentary Network on Education (IPNEd).
- ▶ An increase in engagement with parliamentarians on education, including an expanded membership and core leadership group of the APPG on Global Education.
- ▶ Securing new funding to expand our education advocacy, including the hiring of two staff and renewed focus on UK-facing advocacy to increase the political salience of foundational literacy and numeracy (FLN). As part of our early work on the grant in 2021, we have produced a full landscape analysis of the UK context on FLN, met with leading experts in the field, and conducted extensive desk research which will now feed into the production of a policy report in 2022.
- ▶ Continued facilitation of bridge-building between parliamentarians, the UK Government, academics, civil society and lived-experience voices through APPG parliamentary events and International Development Committee inquiry submissions on education.

THE IMPACT OF THE COVID-19 PANDEMIC ON EDUCATION AROUND THE WORLD DOMINATED GLOBAL EDUCATION ADVOCACY IN 2021.

1.6 billion children

were out of school at the height of the pandemic and many have continued to suffer the effects of educational disruption and school closures.

Even before the pandemic, there were

258 million children

out of school around the world

53% of children

in low- and middle-income countries could not read and understand a simple piece of text at the age of 10

That percentage is now forecasted to rise to a staggering

70% of children

04 ECONOMIC OPPORTUNITY

2021 was a difficult year for our work on economic opportunity as envisaged in our strategy, as we were once again unable to secure funding for this work.

05 DEVELOPMENT FINANCE & TRANSITION

'Transition' is a process by which a country that has received external donor funding through Official Development Assistance (ODA) has that money reduced, ended, or transferred to another programmatic aim as a result of development gains. In 2021, the pandemic continued to thwart and reverse development progress. However, transitions continued to occur across the globe, with some even wrongly accelerated due to cuts in ODA budgets. Against this backdrop lay the continued fallout of the departmental merger which has left the transition portfolio undefined in the newly-formed FCDO. This challenging context has made it more imperative for RESULTS to continue work in this area. Advocacy achievements in 2021 include:

- ▶ RESULTS co-led submissions for two International Development Committee (IDC) enquiries and one call for evidence by the UK Government as co-chair of the UK Sustainability and Transitions Working Group. This involved working collaboratively with partners on in-depth analysis and robust recommendations, despite limited access to the Government's current transition policy positions. This resulted in the Working Group giving *oral evidence* to the IDC. Other channels of advocacy included letters to Ministers, who in their response recognised our submissions and agreed with our recommendations.
- ▶ In August 2021, RESULTS UK published a *briefing* looking at the challenges and opportunities faced by Angola, Chad, and Pakistan during the transition process. The briefing also explored the benefits of an integrated health system beyond polio to other vaccine-preventable and epidemic-prone diseases.
- ▶ Within the ACTION Partnership, RESULTS UK initiated the revival of the Transition Champions Working Group. In 2021, the group finalised their advocacy principles to be used for joint or respective advocacy multilateral and bilateral health transitions.

HOSTED ORGANISATIONS

RESULTS HOSTS FOUR ORGANISATIONS THAT ALIGN WITH OUR MISSION AND HELP US TO ACHIEVE OUR STRATEGIC OBJECTIVES RELATING TO HEALTH AND EDUCATION. WHILE THESE ORGANISATIONS ARE LEGALLY PART OF RESULTS UK, THEY EACH HAVE AN INDEPENDENT ADVISORY GROUP THAT STEERS THEIR WORK. WE ARE PROUD OF THE WORK THESE ORGANISATIONS ACHIEVED IN 2021 AND THAT WE WERE ABLE TO FACILITATE THIS THROUGH OUR HOSTING AGREEMENTS.

SEND MY FRIEND TO SCHOOL

2021 was an important year for Send My Friend to School (SMF), as the UK hosted three important events that had particular significance for Global Education: the UK's G7 Presidency in Cornwall; co-hosting the Global Partnership for Education replenishment in London; and hosting COP26 in Glasgow. In February 2021, we launched a campaign called 'Education Interrupted', focusing on the importance of these three events in providing financial assistance to global education. We were supported by 12 fantastic high-level advocates, the SMF campaign champions, who are aged 14-16. We delivered training online but they were luckily able to take part in a number of in-person events.

Campaign Champions with Shirley Anne Sommerville, Scottish Cabinet Minister for Education and skills. © Send My Friend to School, 2021

Send My Friend to School delivered the Education Interrupted campaign in a number of ways:

- ▶ SMF produced three reports focused on each of the events: (1) *Turning the tide on Education*; (2) *The case for GPE replenishment*; and (3) *The Right Climate to Learn*.
- ▶ We ensured that youth voice was central to the campaign by running an online Action Day with MPs and the campaign champions, attending the GPE replenishment event with two campaign champions; attending Labour & Conservative Party Conferences; and attending COP26 with 9 campaign champions.
- ▶ Campaign champions also took part in six online events with our coalition partners. In 2021, SMF also started arranging civil society and FCDO Education meetings, which has been important for building relationships, understanding each other's priorities, and supporting the wider civil society network.

HOSTED
ORGANISATIONS

INTERNATIONAL PARLIAMENTARY NETWORK FOR EDUCATION

After launching in September 2020, 2021 was an important year of growth for the International Parliamentary Network for Education (IPNEd). While the challenge of COVID-19 continued, virtual convenings organised by the Network have enabled both depth and breadth of engagement across IPNEd's membership.

- ▶ At the close of 2021, the Network's membership had grown to over 375 parliamentarians in over 55 countries. A key moment in the Network's development was the move to an elected Global Executive Committee, with the first election taking place in November and December 2021.
- ▶ Throughout the year, the IPNEd Secretariat worked closely with parliamentarians across the Network, including the Global Executive Committee, to advocate for education. This included convening parliamentarians for closed parliamentary roundtables, including on the topics of school meals programmes and refugee inclusion in national education systems; regional exchanges on financing for education; and webinars spotlighting parliamentary action, for example on protecting education from attack. Across the key global education moments in 2021, IPNEd member parliamentarians played a pivotal role.
- ▶ The Secretariat also worked directly with parliamentarians to take action for education. Across the parliamentary functions of representation, advocacy, legislation, budgeting and scrutiny, parliamentarians were supported to hold their governments to account on a variety of topics including education financing, the education crisis in Afghanistan, and the intersection between education and climate change.
- ▶ IPNEd also played a convening role among global education organisations and advocates, in particular, to highlight the education crisis in Afghanistan, when the Secretariat coordinated a civil society organisation sign-on letter advocating for the international community to adopt an education plan for Afghan children. The IPNEd Secretariat continues to work in close collaboration with RESULTS colleagues in the UK, Canada and US to reinforce our respective parliamentary advocacy.

On Thursday 3 June 2021, almost 100 members of parliament from around the world raised their hands in support of GPE's financing campaign at a high-level roundtable convened by IPNEd.

HOSTED
ORGANISATIONS

THE GLOBAL TB CAUCUS

Despite the COVID-19 pandemic and the different commitments of parliamentarians, the Global TB Caucus (GTBC) made some remarkable achievements in 2021:

- ▶ The Global TB Caucus engaged Italian authorities and parliamentarians to address the need to tackle tuberculosis need for continuity in the run-up to the subsequent presidencies of the G20 and G7 (Indonesia and Germany respectively). In conjunction with the Global Fund and the G20 Health and Development Partnership, the Caucus organised a series of events, including a multilateral virtual meeting with the participation of MPs and ministerial authorities from Italy, Germany and Indonesia.
- ▶ In 2021, the Caucus secretariat secured a new Global Fund grant dedicated to the Americas region to ensure the continuity of the work in the region.
- ▶ After a first three-year grant from the Bill and Melinda Gates Foundation, in 2021, the Caucus secretariat ensured a new three-year grant from the foundation to support a large part of the work of the Caucus.
- ▶ The Caucus developed a new visual identity and website to improve communications with parliamentarians and stakeholders.
- ▶ As part of our TB-REP 2.0 project, we ran a workshop to inform parliamentarians about human-rights based legislation. Participants discussed the need to include in the legislation of countries the compulsory treatment of patients affected by TB; the continuation of 'DOTS' implementation; and other issues related to legal norms in the context of protecting the rights of patients affected by TB. Parliamentarians also discussed developments in public health legislation, highlighting the challenges and differences in implementation in their respective countries.
- ▶ The Caucus secretariat launched a report with the findings of a survey deployed in 2020, to analyse the work with Civil Society Organisations (CSOs) between 2014 and 2020 via interviews with MPs and CSOs, surveys and analysing our historical data. This was to ascertain the nature and frequency of interactions between CSOs and MPs before the Caucus was established, since the Caucus was established, and since the onset of the COVID-19 pandemic, to assess the role that CSOs play in supporting Parliamentarians to take action to end TB.
- ▶ Between 2020 and 2021, in lieu of in-person events, the Caucus managed to mobilise parliamentarians and partners through different formats of virtual meetings, with webinars, roundtables, workshops and meetings, and reinforce the commitments of the TB community to continue tackling TB.
- ▶ In an effort to strengthen MP connections with regional 'Focal Point', the Caucus launched the Platform of Experts (PoE) with the aim of sharing expertise between MPs and CSOs across regions, as well as exchanging ideas that accelerate progress towards the 2018 UN High Level Meeting TB targets and the Sustainable Development Goals. - Since 2020, the Caucus secretariat has had a representative co-chairing the Accountability coordination group, gathering partners once a month to discuss and address TB accountability mechanisms. As part of this, the Secretariat developed an additional checklist designed for use at the national level.

HOSTED
ORGANISATIONS

TB EUROPE COALITION

Governance, accountability, transparency, and sustainability have been a particular focus of TBEC's work this year. We developed a wide variety of processes and documents to ensure the preservation of institutional knowledge, as this was the last year TBEC Secretariat Staff would be hosted by RESULTS UK, with the end of our European Commission funding for the network, and supported growth of TBEC Netherlands, now TBEC's main legal entity. We are delighted that the work of the Coalition will continue through the secretariat based in Kiev, despite the ongoing Ukraine crisis, and will continue to work closely with high burden countries in Eastern Europe.

In addition to our regular communications (monthly newsletters, quarterly advocacy updates, and regular updates across our website and social media profiles), TBEC has also coordinated several thematic communications campaigns and published guides on issues including TB and migration; International Women's Day; World TB Day; European Testing Week; TB and COVID-19; and Research and Development.

We have continued our long-standing partnerships, including with RUK, and have continued to work on advocacy at the G20 and C20 on TB, contributing to policy packs and supporting coordinated global advocacy. At the EU level, we have continued to sit on the Steering Committee for the EU Civil Society Forum, which remains the key advocacy body in the EU for joint coordination on ending the epidemics of infectious diseases.

We were pleased to be admitted to the Antimicrobial Resistance Network this year, and hope to use our experience to help it develop work on antimicrobial resistance and its dangers for the spread of drug-resistant TB in the region.

We continue to work closely with representatives of the Global TB Caucus, which has seen great success in advocacy at EU level this year, deepening partnerships and working with national representatives.

One of our key priorities is to ensure that we are responding to members' needs and developing the skills and best practice shared among civil society working on TB in the region. Given the impossibility of safely conducting in-person events, we focused on the development of a ten-week mentoring programme, which responded to participants' skills and needs, through a series of webinars.

We also organised a survey on the impact of TB on patient mental health, a topic that has clear implications for rates of treatment adherence, stigma, and general wellbeing. We hope to be able to expand these campaigns in the future, as these pilot studies garnered key data that merits further investigation.

INCOME

Total income in 2021 was £1,655,249 (2020: £2,005,578). The difference from the prior year is largely attributable to our revenue recognition policy: a tranche of grant funding was recognised in late 2020 despite it relating to activity planned for 2021. The pandemic has also had an impact in that grant renewals were delayed due to the inability to deliver the intended activities due to the Covid-19 lockdown and restrictions on travel. Most funding received a no-cost extension. Of the total figure, income related to programmes which are run by RESULTS UK's senior management team was £805,846, a decrease of £111,665 compared to 2020. Income relating to the work of organisations which are hosted by RESULTS UK was £816,974, a decrease of £233,713 compared to 2020, all of which are restricted funds to support this specific work. The largest components of the £806,144 of total income related to RESULTS UK were 3 grants from Results Education Fund USA: £384,294 for the ACTION Infectious Diseases Fund, £192,321 for the ACTION Child Survival Fund and £88,151 for the Foundational Literacy and Numeracy Fund. Income received and managed in support of the work of hosted organisations was £554,284 in respect of the Global TB Caucus, £110,678 for Send My Friend to School Campaign, £103,875 for the TB Europe Coalition and £48,137 for the International Parliamentary Network on Education. All of this income is restricted funding.

EXPENDITURE

Total expenditure in 2021 was £1,669,925 (2020: £1,657,318). £21,384 was spent on raising funds and the remainder, £1,648,541, was spent on charitable activities. Of this figure, £942,841 was spent on programmes run by the Senior Management Team of RESULTS UK and £705,699 was related to the work of organisations which RESULTS UK hosts. An operating deficit of £14,677 was recorded at the year-end (2020: a surplus of £348,260). This is a consequence of higher than anticipated expenditure on legal fees and project overspend on our citizen voice work.

RESERVES POLICY

Unrestricted reserves decreased by £48,594 over the period to a total of £146,153 as at 31 December 2021. Free reserves amount to £144,674 (2020: £191,788). Most of our grant agreements provide that overheads are charged against the appropriate Restricted Funds in pre-agreed proportion to the activity expenditure. Therefore the disruption to anticipated charitable activities caused by the pandemic meant that we were unable to recover the expected proportion of costs from Restricted Funds and it has been necessary to deplete Unrestricted Funds to make up the shortfall. It is the Trustees' intention to restore the reserves to the target balance as soon as possible. However, there are ongoing challenges associated with the return to pre-Covid levels of activity and changes in the advocacy funding environment in the UK. These considerations are a focus of our current strategic review.

THANK YOU

RESULTS' advocacy successes would not be possible without the support of our donors, who provide us with the finances needed to undertake our work. We also depend on strong partnerships and effective collaborations with other civil society organisations around the world, including UK coalition partners, APPG chairs, our international ACTION partners, and our European partners. Our work would also simply not be possible without the dedication and commitment of our grassroots campaigners, whose efforts underpin all of our wider policy and advocacy work. Lastly, we would like to thank our staff and board members for their work in supporting the organisation through another year of unprecedented changes due to the pandemic, and for working hard to adapt activities which would previously have been conducted face to face.
